DD15 Turbo

Detroit DD15 Change Out Turbo

88DED15001048

Detroit's proprietary turbocharger is a huge contributing factor to the overall reliability, durability, and performance of the engine. The turbocharger is optimally matched to the exhaust gas recirculation system for significant improvements in real-world fuel economy, without sacrificing any of the performance you've come to expect from the DD15. The DD15 turbo design has been streamlined for reduced weight and even greater efficiency and reliability.

When was the last time you changed out your turbocharger?

Detroit genuine DIY offer

60,000 kilometre oil change interval when used in Detroit DD15 engines

Performance Plus FE 10W-30 FA-4 20L

Features & benefits:

- Improving fuel efficiency – Lower viscosity (thinner) oils provide less flow resistance for greater fuel efficiency and lower CO2 emissions.
- High-temperature-high-shear (HTHS) viscosity measures the ability of an oil to flow efficiently at engine operating temperatures (150°C) through narrow spaces between dynamic components, for example, in the valve train.
- Lower emissions – Each litre of diesel saved cuts CO2 emissions by 2.6 kg, and engine manufacturers have started to recognise that low HTHS-viscosity oils as a way of improving fuel efficiency.

23539984

\$265

Platinum Plus CK4 20L

Features & benefits:

- Emissions system compatibility.
- Advanced low-ash formulation helps control blocking or poisoning exhaust after-treatment devices, helping maintain vehicle emission compliance and engine fuel efficiency.
- Lower operating costs.
- Detroit Platinum Plus is formulated with an enhanced acid-control system to help fleet operators achieve maximum drain flexibility.
- Outstanding wear protection.
- Demonstrated over millions of kilometres of customer service, Detroit Platinum Plus provides significantly higher levels of wear protection than previous main applications.
- Severe duty heavy duty diesel engines.
- Detroit Platinum Plus is our highest performance.
- 15W-40 heavy duty diesel engine oil providing outstanding protection for virtually all engines, including the latest ADR80/04 engines, as well as older units.

StepUP Overhaul 1

12 Month Warranty on Parts and Labour

RECEIVE A FREE
DETROIT HOTSHOT
BOTTLE WITH
EACH OVERHAUL

StepUP 1 includes:

- Complete set of six cylinder kits:
– including pistons, rings, liners, and seals
- Overhaul gasket kit including gaskets, seals, and O-rings
- Cam bearing shells
- Main bearing set
- Thrust bearing set
- Big end bearings
- 38L Detroit Premium Plus oil
- 60L Detroit PowerCool coolant
- Two filter kit
- Labour completed by factory-trained technicians
- 12 month warranty on parts and labour

StepUP Overhaul 2

12 Month Warranty on Parts and Labour

RECEIVE A FREE DETROIT HOTSHOT BOTTLE WITH EACH OVERHAUL

StepUP 2 includes:

- Complete set of six cylinder kits: – including pistons, rings, liners, and seals
- Overhaul gasket kit including gaskets, seals, and O-rings
- Cam bearing shells
- Main bearing set
- Thrust bearing set
- Big end bearings
- Cylinder head
- 38L Detroit Premium Plus oil
- 60L Detroit PowerCool coolant
- Two filter kit
- Labour completed by factory-trained technicians
- 12 month warranty on parts and labour

Optional Extras for StepUP 1 or 2

Front and rear rocker arm (HK, HG & PK)	\$4,517
Oil pressure regulator	\$159
Oil pressure relief valve	\$234
Counterbore inserts × 6 (installed)	\$2,744
Injectors set of 6 (HK only)	\$4,900

Recapture Lost Power and Increase Performance

RECEIVE A FREE
DETROIT HOTSHOT
BOTTLE WITH
EACH OVERHAUL

Step 1 Includes

- Complete set of six cylinder kits including:
 - Heavy-duty pistons, carbon scraper rings, skirts and pins
 - Cylinder liners and seals
- Cylinder head
- Oil filter
- Oil pan gasket
- Coolant filter
- Fuel filter kit
- Injector harness
- Lower-end bearing kit including:
 - Lower main bearings/shells
 - Upper main bearings/shells
 - Connecting rod bearings/shells
 - Thrust washers
- Cylinder head bolt set
- Cylinder head gasket kit
- 45L Detroit engine oil
- 65L Detroit coolant
- Labour completed by factory-trained technicians
- 12 month warranty on parts and labour

Detroit DD15 Change Out High Pressure Pump

One of the central attributes of the DD15 is clean and efficient fuel combustion. This is based on the electronically-controlled Amplified Common Rail Fuel System, which controls the entire injection sequence at any operating point. As the highest pressure is only generated in the injectors, the injection processes are extremely stable. This results in quiet, refined operation with low fuel consumption and reduced emissions.

If your engine is hard to start or suffering poor performance due to slow pressure build up in your fuel system, it might be time to replace the high pressure fuel pump.

Detroit engines perform at their peak for kilometre after kilometre, with best-in-class fuel economy, and low-cost maintenance and service. Every step of our design, testing, and manufacturing process builds quality into every engine that bears the Detroit name. The focus of Detroit engineers is to achieve the most effective combination of performance and fuel economy. Their goal is to design and build engines that enable customers to operate their fleets more efficiently and ultimately to provide a lower cost of ownership. Our engine technology and enhancements offer an unprecedented level of efficiency. Purchase a new Detroit DD15 today and take advantage of our national two-year unlimited kilometre warranty. Ask your local Detroit dealer for a complete installed price.

 CORE CHARGES APPLY

The ¾ DD15 & DD15 long block are the perfect solution in a range of circumstances, particularly beneficial for customers with non-functioning crankshafts, delivering time and cost savings through the replacement of the existing engine block and crankshaft. The ¾ engine is choice for DD15 engines built before 2016 and the long block is better suited to engines built after 2016. In addition to being an economically-favourable solution, these engine packages delivers the complete internal gear train and ease of installation with flywheel and flywheel housing being an exact match ensuring seamless bolting of engine to transmission.

Warranty 12 months, 160,000 kms
