PENSKE PARTS

Detroit DD15 Engine Tune-Up

Benefiting from state-of-the-art design and manufacturing processes developed by some of the world's best engineers, and using advanced materials, Detroit's DD15 boasts engine tune-up intervals of 400,000 kilometres. Whilst other manufacturers require you to undertake extensive component change-outs at the engine's midlife, which can cost up to \$16,000, the DD15 does not. This provides additional cost of ownership benefits and keeps your truck on the road longer.

To get the most out of your Detroit, book a tune-up at one of our Penske Australia branches and maximise your truck's performance.

PENSKE PARTS

Detroit Genuine DIY Offer

60,000 kilometre oil change interval when used in Detroit DD15 engines

Platinum Plus CK4 20L

Features & benefits:

- Emissions system compatibility.
- Advanced low-ash formulation helps control blocking or poisoning exhaust after-treatment devices, helping maintain vehicle emission compliance and engine fuel efficiency.
- Lower operating costs.
- Detroit Platinum Plus is formulated with an enhanced acid-control system to help fleet operators achieve maximum drain flexibility.
- Outstanding wear protection.
- Demonstrated over millions of kilometres of customer service, Detroit Platinum Plus provides significantly higher levels of wear protection than previous main applications.
- Severe duty heavy duty diesel engines.
- Detroit Platinum Plus is our highest performance.
- 15W-40 heavy duty diesel engine oil providing outstanding protection for virtually all engines, including the latest ADR80/04 engines, as well as older units.

23512733

\$145

Performance Plus FE 10W-30 FA-4 20L

Features & benefits:

- Improving fuel efficiency – Lower viscosity (thinner) oils provide less flow resistance for greater fuel efficiency and lower CO₂ emissions.
- High-temperature-high-shear (HTHS) viscosity measures the ability of an oil to flow efficiently at engine operating temperatures (150°C) through narrow spaces between dynamic components, for example, in the valve train.
- Lower emissions – Each litre of diesel saved cuts CO₂ emissions by 2.6 kg, and engine manufacturers have started to recognise that low HTHS-viscosity oils as a way of improving fuel efficiency.

PENSKE PARTS

Allison Oil & Filter Service Packs

Shell Spirax® S6 ATF A295 is a synthetic fluid developed specifically for Allison Transmission, enabling you to achieve the maximum oil drain interval, confident that the transmission components are protected from wear. You can rely on Shell Spirax® S6 ATF A295 to last for up to 480,000 km under normal conditions, or 240,000 km under severe conditions, without risk to the transmission components or the warranty*.

APPLICATIONS

Shell Spirax® S6 ATF A295 is specifically developed for Allison heavy-duty transmissions used in public service and transport applications such as modern commercial trucks, buses, utility vehicles, or haulers. It is an excellent choice for use in applications requiring former GM DEXRON® III ATF Voith DIWA transmissions.
