

PENSKE SERVICE

Detroit DD15 Engine Tune-Up

Benefiting from state-of-the-art design and manufacturing processes developed by some of the world's best engineers, and using advanced materials, Detroit's DD15 boasts engine tune-up intervals of 400,000 kilometres. Whilst other manufacturers require you to undertake extensive component change-outs at the engine's midlife, which can cost up to \$16,000, the DD15 does not. This provides additional cost of ownership benefits and keeps your truck on the road longer.

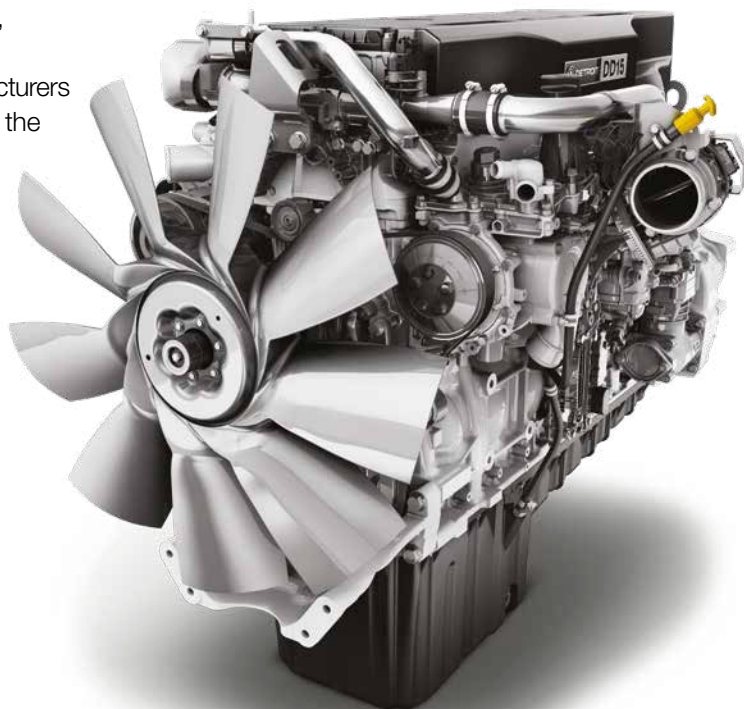

To get the most out of your Detroit, book a tune-up at one of our Penske Australia branches and maximise your truck's performance.
