

## Allison Oil & Filter Service Packs Promotion

Shell Spirax® S6 ATF A295 is a synthetic fluid developed by Shell Lubricants for Allison. It is a fluid you can rely on to last for up to 480,000km under normal conditions or 240,000km under severe conditions, without risk to the transmission components or the warranty (recommended maintenance interval varies by trans-mission series and service). Shell Spirax® S6 ATF A295 enables you to go to the maximum oil-drain intervals with the confidence that the transmission components are protected from wear.

### APPLICATIONS

Specifically developed for Allison heavy-duty transmissions used in public service and transport applications such as modern high performance trucks, buses, utility vehicles, or haulers. Excellent choice for use in applications requiring former GM DEXRON® III ATF Voith DIWA Transmissions.

### Shell Spirax® S6 ATF A295 Premium Automatic-Trans Fluid For Allison Transmissions
